```java
package Assignment;
import java.util.Scanner;

class ThreadInterruptor extends Thread{
    public void run() {
        try{
            Thread.sleep(60000);
            System.out.println("Better Luck Next Time :(");
            System.exit(0);
        }catch(InterruptedException e)
        {
            throw new RuntimeException(e);
        }
    }
}
public class InterruptingThread {
    public static void main(String[] args){
        ThreadInterruptor t = new ThreadInterruptor();
        Scanner sc =new Scanner(System.in);
        System.out.println("This is a question??");
        System.out.println("Please Answer:");
        t.start();
        String s = sc.next();

        if(s != null){
            System.out.println("Congratulations! :)");
            System.exit(0);
        }
    }
}
